

# Quality Microscope Service On-Site

We specialize in quality local microscope service, so that you have the finest working tools available for your science classes! Precision instruments should be serviced annually to maintain the finest operating condition and to allow for the optimal learning experience for your students.

**Scheduled on-site service** includes the cleaning, service, and repair needed for each microscope. See our website for complete details. Service is conducted at your school, minimizing downtime and allowing service to be scheduled anytime during the school year! Cleaning and preventative maintenance of most educational microscopes is \$36 per unit, parts additional. Questions? Contact us at [info@ScientificSpecialties.biz](mailto:info@ScientificSpecialties.biz).

**To order**, complete your school's official purchase order, and mail or fax it to our office. It's that simple! We will contact you to schedule a service call at a time that is convenient for all. A service call fee of \$75 is applicable for orders under 25 units or travel distance over 150 miles from our office.

Service	Unit Price
Microscope Cleaning – Preventative Maintenance .....	\$ 36
Mechanical Balance – Cleaning, Repair, Calibration.....	\$ 24
Electronic Balance – Cleaning, Repair, Non-cert. Calibration.....	\$ 36
Service Call – (Under 25 units or over 150 miles).....	\$ 75

**Funding** for our service most frequently comes from a school's maintenance or R&R (repair/replacement) funds rather than the science budget! We recommend you ask your school's administration for more information. Routine preventative maintenance is the cost-effective alternative to the purchase of replacement equipment.

**Thank you** in advance for your business. We appreciate the opportunity!
